Trading solution systems

TRADING TO THE NEXT LEVEL

euSpeed was born in Albenga (Liguria - Italy) from an idea of the famous Italian scalper Roberto Vernaleone.

The experiences and skills he has achieved in the financial field brought him to create the euSpeed diamond point product, the ScalpTool.

Supported by a highly qualified team, which is very experienced both in technology and finance, euSpeed aims at becoming a multi level society. That means it will be able to fulfill every trader's demand: from the trading on line followers, to the institutional customers, who will benefit from products and technologically advanced solutions more suitable for property trading.

Although euSpeed is a young society, it can boast important partnership with Italian brokers and with international brokers, such as Mirus Futures from Chicago.

euSpeed can satisfy traders and
institutionals with its multi level
solutions
